

SHIVA AMVAJ STAIRWAY TIMER

SHIVA **Amvaj**

MODEL : STJN-10M
CODE : 14JN1
WEIGHT: 110 gr
(36x90x65) mm
IP 30

This device works in two different modes :

AUTO :

Set your desired time from 1 to 10 minutes. Then put the key placed on device to A mode and connect input electricity. By pressing each of switches, lamps get turned on and after passing time they get adjusted and turned off.

MANUAL :

In parties or times when you want lamps to remain turned on, put the key placed on device to M mode. Now by pressing one of switches, lamps get turned on permanently. To make lamps get turned on, it is necessary to return key to A mode in order to make lamps get turned off after time passing.

SHIVA **Amvaj**

- Capability to— Instal an infinite number of switches
— seal panel
— be installed on the rail and other surfaces easily
- Small size

Technical specifications

- Supply voltage : 180-250VAC/50-60HZ
- Disconnection delay time : 1-10 min
- Efficiency at— Temperature : -20°C .. +65°C
Humidity : 70%
- Device consumption in waiting mode : \approx 0
- Output : 16A relay

Respecting the customer is our duty

3 year no question asked guarantee under these condition:

- at most it should be within 3 years from the date printed on the label of the product
- the label on the product should be safe and sound
